PART 1

Questions 1–8

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

FIRE CREWS HUNT ESCAPED HAMSTER

Eight firefighters have been called in to help find an escaped hamster. Two crews used a chocolate-covered camera and a vacuum cleaner to try and locate the missing **Q1**_____, called Fudgie, at the home of a six-year-old girl in Dunbar, Scotland.

The girl's mother said: 'We came down for breakfast and discovered Fudgie had opened the top lid of her cage and had made her way into the kitchen and we think she has gone through a small hole in the floor.'

The fire crews spent five hours trying to recover the pet after it ran down a hole in the kitchen floor. But, the hamster still refused to come out of the **Q2**_____.

In the search for **Q3**_____, the firefighters took the family cooker and gas pipes apart. They also dropped a mini-camera coated with chocolate under the floorboards. They then hoped to take out the hamster using a vacuum cleaner. Despite all their efforts, they failed to find Fudgie.

In the end, the **Q4**_____ put another camera down the hole and left it under the floorboards, connected to the screen of the family home computer, to see if Fudgie appeared. Besides, the **Q5**_____ and her parents regularly dropped food through the **Q6**_____ for the **Q7** _____

At last, after eight days the hamster returned to her cage safe and sound. She crawled from the hole in the kitchen floor early in the morning. It was the girl's father who first found Fudgie and locked the runaway hamster.

The girl said that day it was like Christmas morning for her. Her parents added that they too felt extremely happy when Fudgie had finally **Q8**_____.

PART 2

Questions 9–15

Read the descriptions of ten places. Decide which place would be the most suitable for you. For Questions 9–15, select the best place.

9

Person 9

You are interested in classical music and want to talk to professional musicians about their work. You'd like to find out more about classical instruments, and actually play some music.

10

Person 10

You want to learn to play some of your favourite band's songs, and to know how your favourite singers create their own special sound. You'd like to try out some different instruments.

11

Person 11

You love watching spectacular concerts with fantastic dancers, and want to feel some of the atmosphere of a big musical event. You'd like to see performances by famous people you have heard about.

12

Person 12

You like exploring the personal backgrounds of your favourite bands, and also the stories behind their well-known songs. You have your own band, and want some advice about performing live on stage.

13

Person 13

You like listening to all sorts of pop music, and want a fun way to learn various dance styles. You'd like to bring something home to show your friends what you have learnt during your visit.

14

Person 14

You want to go to a show that's a bit frightening. You'd like to see a story set in the past and realistic costumes from the period.

15

Person 15

You want a show with dancing, as well as songs by well-known musicians. You'd like the music to be in a range of styles from around the world.

A) The Core: This is the place for musical history. You'll learn where your favourite singers and musicians grew up and discover the processes involved in writing famous songs and producing the videos. Find out about their journey to fame, and get some tips on what makes a good concert! There's all you ever wanted to know about famous musicians.

B) Rhythm-Studio: Get your body moving in the studio and learn to move to rhythms and sounds from the past to now, including Soul and Disco. Learn your steps from our professional onscreen dance instructor, then watch your performance and become the star in your own video recording which you can take away.

C) Mary Wright: The two well-known lead actors in this 16th-century drama are surprisingly good dancers, and the music creates quite a scary atmosphere. The clothes by top designer Jean Luc Filbert are historically accurate and look absolutely wonderful.

D) Universe of Sound: Create your own musical experience – record yourself making music with a huge orchestra as they play on the video background screen – you can even download it to disc to take home! You can also learn about violins, flutes, trumpets and many more with our computer demonstrations, and meet real musicians who are present every day.

E) ArchivedImages: Want to find out about a new band, or just want more information about an old favourite? Visit our collection to find out facts and figures, or see the actual possessions of famous bands and musicians you are interested in. You can actually get to touch things worn on stage at major rock and pop events, and there are plenty of other concert souvenirs.

F) Finale: Imagine being in the crowd for amazing performances from the past. Enjoy 3D life-size videos from the stars of yesterday and today. You can experience the excitement of a massive rock stadium, and the sounds, movement and rhythms that created some of the most exciting music ever known.

G) Rave-on!: How about learning new skills on the guitar, drums and keyboard by video? Follow the touch-screen instructions to find lessons on each instrument, or search for a song to practise playing along to. Try our Professional Selection, with video clips of band members who will explain the techniques that make their recordings so individual.

H) Show-in-a-day!: Be a star singer or dancer for the day in a one-time-only special performance! Experts in international music and dance styles will train you, and costumes provided for the performance help create a really special, individual show. Get your friends and family to come and see you perform, as no videoing or photography is allowed.

I) WorldScene: For one month only, experience the amazing sights and sounds of the WorldScene band, a large international group of traditional musicians and dancers. You'll experience music and dance styles never heard or seen before in this country. Book a ticket to meet the musicians, talk about their experiences and get some new ideas!

J) Keeping Time: Keeping Time is based on the real-life story of the popular group Marcellous, and includes their best work. We see how having members from three different continents allowed them to create songs using music from each place. Unusually, there's ballet in this show, but it goes surprisingly well with their music.

PART 3

Questions 16–21

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

List of Headings:

I) The House of Commons
II) Parliamentary Procedure
III) The House of Lords
IV) Westminster
V) The System of Government
VI) Parliamentary Committees
VII) Whitehall
VIII) The Crown

16. Paragraph A **17. Paragraph B** **18. Paragraph C**
19. Paragraph D **20. Paragraph E** **21. Paragraph F**

A. Her Majesty's Government, in spite of its name, derives its authority and power from its party representation in Parliament. Parliament is housed in the Palace of Westminster, once a home of the monarchy. Like the monarchy, Parliament is an ancient institution, dating from the middle of the thirteenth century. Parliament is the seat of British democracy, but it is perhaps valuable to remember that while the House of Lords was created in order to provide a council of the nobility for the king, the Commons were summoned originally in order to provide the king with money.

B. The reigning monarch is not only head of state but symbol of the unity of the nation. The monarchy is Britain's oldest secular institution, its continuity for over a thousand years broken only once by a republic that lasted a mere eleven years (1649-60). The monarchy is hereditary, the succession passing automatically to the oldest male child, or in the absence of males to the oldest female offspring of the monarch. In law the monarch is head of the executive and of the judiciary, head of the Church of England, and commander-in-chief of the armed forces.

C. The dynamic power of Parliament lies in its lower chamber. Of its 650 members, 523 represent constituencies in England, 38 in Wales, 72 in Scotland and 17 in Northern Ireland. There are only seats in the Commons debating chamber for 370 members, but except on matters of great interest, it is unusual for all members to be present at any one time. Many MPs find themselves in other rooms of the Commons, participating in a variety of committees and meetings necessary for an effective parliamentary process.

D. Britain is a democracy, yet its people are not, as one might expect in a democracy, constitutionally in control of the state. The constitutional situation is an apparently contradictory one. As a result of a historical process the people of Britain are subjects of the Crown, accepting the Queen as the head of the state. Yet even the Queen is not sovereign in any substantial sense since she receives her authority from Parliament, and is subject to its direction in almost all matters. This curious situation came about as a result of a long struggle for power between the Crown and Parliament during the sixteenth and the seventeenth centuries.

E. Her Majesty's Government governs in the name of the Queen, and its hub, Downing Street, lies in Whitehall, a short walk from Parliament. Following a general election, the Queen invites the leader of the majority party represented in the Commons, to form a government on her behalf. Government ministers are invariably members of the House of Commons, but infrequently members of the House of Lords are appointed. All government members continue to represent "constituencies" which elected them.

F. Each parliamentary session begins with the "State Opening of Parliament", a ceremonial occasion in which the Queen proceeds from Buckingham Palace to the Palace of Westminster where she delivers the Queen's Speech from her throne in the House of Lords. Her speech is drafted by her government, and describes what the government intends to implement during the forthcoming session. Leading members of the Commons may hear the speech from the far end of the chamber, but are not allowed to enter the House of Lords.

PART 4 Questions 22–29

Read the following text for questions 22–29.

THE SECRETS OF PERSUASION

Our mother may have told you the secret to getting what you ask for was to say please. The reality is rather more surprising. Adam Dudding talks to a psychologist who has made a life's work from the science of persuasion. Some scientists peer at things through high-powered microscopes. Others goad rats through mazes or mix bubbling fluids in glass beakers. Robert Cialdini, for his part, does curious things with towels and believes that by doing so he is discovering important insights into how society works.

Cialdini's towel experiments (more of them later), are part of his research into how we persuade others to say yes. He wants to know why some people have a knack for bending the will of others, be it a telephone cold-caller talking to you about timeshares, or a parent whose children are compliant even without threats of extreme violence. While he's anxious not to be seen as the man who's written the bible for snake-oil salesmen, for decades the Arizona State University social psychology professor has been creating systems for the principles and methods of persuasion and writing bestsellers about them. Some people seem to be born with the skills; Cialdini's claim is that by applying a little science, even those of us who aren't should be able to get our own way more often. "All my life I've been an easy mark for the blandishment of salespeople and fundraisers and I'd always wondered why they could get me to buy things I didn't want and give to causes I hadn't heard of," says Cialdini on the phone from London, where his is plugging his latest book.

He found that laboratory experiments on the psychology of persuasion were telling only part of the story, so he began to research influence in the real world, enrolling in sales-training programmes: "I learnt how to sell automobiles from a lot, how to sell insurance from an office, how to sell encyclopedias door to door." He concluded there were six general "principles of influence" and has since put them to the test under slightly more scientific conditions. Most recently, that has meant messing about with towels. Many hotels leave a little card in each bathroom asking guests to reuse towels and thus conserve water and electricity and reduce pollution. Cialdini and his colleagues wanted to test the relative effectiveness of different words on those cards. Would guests be motivated to co-operate simply because it would help save the planet, or were other factors more compelling? To test this, the researchers changed the card's message from an environmental one to the simple (and truthful) statement that the majority of guests at the hotel had reused their towel at least once. Guests given this message were 26% more likely to reuse their towels than those given the old message. In Cialdini's book "Yes! 50 Secrets from the Science of Persuasion", co-written with another social scientist and a business consultant, he explains that guests were responding to the persuasive force of "social proof", the idea that our decisions are strongly influenced by what we believe other people like us are doing.

So much for towels. Cialdini has also learnt a lot from confectionery. Yes! Cites the work of New Jersey behavioural scientist David Strohmetz, who wanted to see how restaurant patrons would respond to ridiculously small favour from their food server, in the form of after-dinner chocolate for each diner. The secret, it seems, is in how you give the chocolate. When the chocolates arrived in a heap with the bill, tips went up a miserly 3% compared to when no chocolate was given. But when the chocolates were dropped individually in front of each diner, tips went up 14%. The scientific breakthrough, though, came when the waitress gave each diner one chocolate, headed away from the table then doubled back to give them one more each as if such generosity had only just occurred to her. Tips went up 23%. This is "reciprocity" in action: we want to return favours done to us, often without bothering to calculate the relative value of what is being received and given.

Geeling Ng, operations manager at Auckland's Soul Bar, says she's never heard of Kiwi waiting staff using such a cynical trick, not least because New Zealand tipping culture is so different from that of the US: "If you did that in New Zealand, as diners were leaving they'd say 'can we have some more?'" But she certainly understands the general principle of reciprocity. The way to a diner's heart is "to give them something they're not expecting in the way of service. It might be something as small as leaving a mint on their plate, or it might be remembering that last time they were in they wanted their water with no ice and no lemon. "In America, it would translate into an instant tip. In New Zealand, it translates into a huge smile and thanks to you." And no doubt, return visits.

Choose the correct letter, A, B, C or D.

22 The main purpose of Cialdini's research of writing is to

A) explain the reason why researcher should investigate in person
B) explore the secret that why some people become the famous salesperson
C) help people to sale products
D) prove maybe there is a science in the psychology of persuasion

23 Which of the statement is CORRECT according to Cialdini's research methodology

A) he checked data in a lot of latest books
B) he conducted this experiment in the laboratory
C) he interviewed and contract with many salespeople
D) he made lot phone calls collecting what he wants to know

24 **Which of the following is CORRECT according to towel experiment in the passage?**

A) Different hotel guests act in a different response
B) Most guests act by the idea of environment preservation
C) more customers tend to cooperate as the message requires than simply act environmentally
D) people tend to follow the hotel's original message more

25 **Which of the following is CORRECT according to the candy shop experiment in the passage?**

A) Presenting way affects diner's tips
B) Regular customer gives tips more than irregulars
C) People give tips only when offered chocolate
D) Chocolate with bill got higher tips

Do the following statements agree with the information given in the reading passage? Write TRUE if the statement agrees with the information, FALSE if the statement contradicts the information, NOT GIVEN if there is no information on this.

26 **Robert Cialdini experienced "principles of influence" himself in realistic life.**

A) True
B) False
C) Not Given

27 **Principle of persuasion has different types in different countries.**

A) True
B) False
C) Not Given

28 **In New Zealand, people tend to give tips to attendants after being served chocolate.**

A) True
B) False
C) Not Given

29 **Elder generation of New Zealand is easily attracted by extra service of restaurants by the principle of reciprocity.**

A) True
B) False
C) Not Given

PART 5 Questions 30–35

Read the text below and answer Questions 30–35.

ARCHITECTURE IN BRITAIN

From the Middle Ages to the 20th century, what are the influences and movements that have shaped the changing face of British architecture?

Romano-British culture—and that included architecture along with language, religion, political organisation and the arts—survived long after the Roman withdrawal. And although the Anglo-Saxons had a sophisticated building style of their own, little survives to bear witness to their achievements as the vast majority of Anglo-Saxon buildings were made of wood.

Even so, the period between the Norman landing at Pevensey in 1066 and the day in 1485 when Richard III lost his horse and his head at Bosworth, ushering in the Tudors and the Early Modern period, marks a rare flowering of British buildings. And it is all the more remarkable because the underlying ethos of medieval architecture was "fitness for purpose". The great cathedrals and parish churches that lifted up their towers to heaven were not only acts of devotion in stone; they were also fiercely functional buildings. Castles served their particular purpose and their battlements and turrets were for use rather than ornament. The rambling manor houses of the later Middle Ages, however, were primarily homes, their owners achieving respect and maintaining status by their hospitality and good lordship rather than the grandeur of their buildings. In a sense, the buildings of the 16th century were also governed by fitness for purpose—only now, the purpose was very different. In domestic architecture, in particular, buildings were used to display status and wealth.

This stately and curious workmanship showed itself in various ways. A greater sense of security led to more outward-looking buildings, as opposed to the medieval arrangement where the need for defence created houses that faced inward onto a courtyard or series of courtyards. This allowed for much more in the way of exterior ornament. The rooms themselves tended to be bigger and lighter—as an expensive commodity, the use of great expanses of glass was in itself a statement of wealth. There was also a general move towards balanced and symmetrical exteriors with central entrances. With the exception of Indigo Jones (1573-1652), whose confident handling of classical detail and proportion set him apart from all other architects of the period, most early 17th century buildings tended to take the innocent exuberance of late Tudor work one step further. But during the 1640s and 50s the Civil War and its aftermath sent many gentlemen and nobles to the Continent either to escape the fighting or, when the war was lost, to follow Charles II into exile. There they came into contact with French, Dutch and Italian architecture and, with Charles's restoration in 1660, there was a flurry of building activity as royalists reclaimed their property and built themselves houses reflecting the latest European trends. The British Baroque was a reassertion of authority, an expression of absolutist ideology by men who remembered a world turned upside down during the Civil War. The style is heavy and rich, sometimes overblown and melodramatic. The politics which underpin it are questionable, but its products are breathtaking.

The huge glass-and-iron Crystal Palace, designed by Joseph Paxton to house the Great Exhibition of 1851, shows another strand to 19th century architecture—one which embraced new industrial processes. But it wasn't long before even this confidence in progress came to be regarded with suspicion. Mass production resulted in buildings and furnishings that were too perfect, as the individual craftsman no longer had a major role in their creation. Railing against the dehumanising effects of industrialisation, reformers like John Ruskin and William Morris made a concerted effort to return to hand-crafted, pre-industrial manufacturing techniques. Morris's influence grew from the production of furniture and textiles, until by the 1880s a generation of principled young architects was following his call for good, honest construction.

The most important trends in early 20th century architecture simply passed Britain by. Whilst Gropius was working on cold, hard expanses of glass, and Le Corbusier was experimenting with the use of reinforced concrete frames, we had staid establishment architects like Edwin Lutyens producing Neo-Georgian and Renaissance country houses for an outmoded landed class. In addition there were slightly batty architect-craftsmen, the heirs of William Morris, still trying to turn the clock back to before the Industrial Revolution by making chairs

and spurning new technology. Only a handful of Modern Movement buildings of any real merit were produced here during the 1920s and 1930s, and most of these were the work of foreign architects such as Serge Chermayeff, Berthold Lubetkin and Erno Gold-finger who had settled in this country.

Complete the sentences. Write NO MORE THAN THREE WORDS from the text in each gap.

QUESTIONS 30–35: SENTENCE COMPLETION

Because most Anglo-Saxon buildings were constructed from **30** _____, few of them have survived.

The owners of medieval manor houses in Britain earned their reputation through their **31** _____ and elegance.

The 16th-century building was designed to show evidence of **32** _____.

In the 16th century, the use of glass was fashionable, even though it was an **33** _____. Indigo Jones was particularly skilful in designing architecture in the **34** _____ style.

Though William Morris designed **35** _____, his emphasis on hand-crafting influenced architects.

MOCK TEST 22

35 answers

1	hamster	**14**	C	**27**	Not Given
2	hole	**15**	J	**28**	False
3	Fudgie	**16**	IV	**29**	Not Given
4	firefighters	**17**	VIII	**30**	wood
5	girl	**18**	I	**31**	hospitality
6	hole	**19**	V	**32**	status and wealth / status wealth
7	hamster	**20**	VII		
8	returned	**21**	II		
9	D	**22**	D	**33**	expensive commodity
10	G	**23**	C		
11	F	**24**	C	**34**	classical
12	A	**25**	A	**35**	furniture and textiles
13	B	**26**	True
