PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

UZBEKISTAN'S NEW U.S. VISA INITIATIVE

The government of Uzbekistan plans to make it easier for its citizens to get U.S. visas. This is part of a new initiative to grow tourism in Uzbekistan. The **Q1**_____ was signed by President Shavkat Mirziyoyev on May 15. As part of this, the Ministry of Foreign Affairs will work on creating a visa-free system for U.S. citizens. This means citizens of US could stay in Uzbekistan for up to 30 days in a three-month period without needing a **Q2**_____. At the same time, the ministry will try to make it easier for Uzbek **Q3**_____ to get U.S. visas. Uzbekistan will also change the entry rules for citizens of Russia, Kazakhstan, and Azerbaijan. People from these countries will be able to enter Uzbekistan for up to 30 **Q4**_____ using just their ID cards or special documents for children. Many Uzbek people apply for and win the U.S. Green Card lottery each year. Over 5,000 Uzbeks get permanent residency in the United States this way. However, many others try to enter and live in the U.S. illegally, often through dangerous journeys from Mexico. Uzbekistan is one of the **Q5**_____ with the most people doing this. The U.S. government has said it wants to send back many people who live there **Q6**_____. During the first months of the year, over 100,000 people were deported.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use.

A) Your dog isn't fit. It needs to eat something that is healthy.

B) Your brother wants to communicate with his new friends in Barcelona and doesn't know how to speak to them.

C) Your kind cousin knows little English and wants to earn some money during the summer.

D) You are worried that you're gaining weight. You want to attend something that makes you lose fat.

E) Your neighbor is fed up with walking to the work. He wants something cheap and dependable.

F) Your parents want to buy a vehicle that is new and fast. They will need a full-service.

G) Your friend wants to do something that is good for his health. He works all week but is free in the evenings.

H) You want to take your family somewhere for fun and shopping this weekend.

I) You want to enroll your daughter in a melodic and engaging class.

J) You want to take your non-speaking friend somewhere.

Yoga for Beginners
Calm Body, Calm Mind – Join Today!
Start your wellness journey with our beginner yoga classes every Monday and Wednesday at 6 PM. No experience needed. First class is free!
Call 0123 456 789 for details

8

Music Lessons
Learn to Play the Piano!
All ages welcome – from complete beginners to advanced players. Lessons from £20/hour. Free trial lesson included.
TunedIn Studio, Elm Road
0111 222 3344

9

Language Classes
Speak Spanish with Confidence!
Evening and weekend classes available. Small groups, friendly teachers, and real-life practice.
Centro Language School
Classes start next Monday! Sign up now at www.centrospanish.com

10

Weekend Market
City Farmers' Market – Every Saturday!
Fresh fruits, vegetables, homemade bread, and local crafts. Fun for all ages with live music and food stalls.
Open 9 AM – 4 PM
Riverside Park
Bring your own bags!

11

Fitness Offer
Get Fit, Feel Great!
Unlimited gym access, swimming pool, and fitness classes for only £25/month.
Open 6 AM – 10 PM daily
Fit4All Gym, Brook Lane
Join online today: www.fit4all.com

12

Summer Job Opportunity
Looking for friendly staff for the summer season. Part-time and full-time roles available.
Must be 16+ and speak basic English
Apply in person: Scoop & Smile, Main Square

13

Car for Sale
Reliable Used Car – Great Deal!
2015 Toyota Yaris, low mileage, full-service history, new tires.
Only £4,500
View in Northside Garage
Call Sarah: 07432 112233

14

Pet Grooming Services
Treat Your Pet to a Spa Day!
Gentle grooming for dogs and cats of all sizes. Nail trimming, shampooing, and fur styling.
Book online: www.happytails.com
0987 654 321

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

List of Headings:

A) Disorders strike much later in life.
B) Drawbacks in public health.
C) Longevity based on high education.
D) The elderly people of today got better nutrition when they were children.
E) The elderly are becoming more well off.
F) Most of independent people over 65 complete activities themselves.
G) Diseases have decreased recently.
H) The potential outbreaks in the U.S.

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

GROWING OF THE AGING SOCIETY

I. Over the last 14 years, The National Long-term Health Care Survey has gathered data from more than 20,000 males and females over the age of 65 about their health and lifestyles. The group has analysed the results of data gathered in 1994 on conditions such as arthritis, high blood pressure and poor circulation; these were the most common medical complaints for this age group. The results show that these conditions are troubling a smaller proportion of people each year and decreasing very quickly. Other diseases suffered by the elderly including dementia, emphysema and arteriosclerosis are also affecting fewer people.

II. According to Kenneth Manton, a demographer from Duke University in North Carolina, 'the question of what should be considered normal ageing has really changed.' He also mentioned that diseases suffered by many people around the age of 65 in 1982 are now not occurring until people reach the age of 70-75.

III. It is clear that due to medical advances some diseases are not as prominent as they used to be. However, there was also be other factors influencing this change. For instance, improvements in childhood nutrition in the first quarter of the twentieth century gave many people a better start in life than was possible before.

IV. The data also shows some negative changes in public health. The research suggests that the rise of respiratory conditions such as lung cancer and bronchitis may reflect changing smoking habits and an increase in air pollution. Manton says that as we have been exposed to worse and worse pollution, it is not surprising that some people over the age of 60 are suffering as a result.

V. Manton also found that better-educated people are likely to live longer. For instance, women of 65 with less than eight years of education are expected to live to around 82. Those who studied more could be able to live seven years longer. Whilst some of this can be attributed to better-educated people usually having a higher income, Manton believes it is mainly because they pay closer attention to their health.

VI. Also, the survey estimated how independent people of 65 were and found a striking trend. In the 1994 survey, almost 80% of them were able to complete activities such as eating and dressing alone as well as handling difficult tasks, like cooking and managing their financial affairs. This situation indicates an important drop among disabled elderly people in the population. If 14 years ago, the apparent trends in the US had continued, researchers believe that there would be one million disabled elderly people in today's population. Manton shows the trend saved more than $200 billion for the US's governments Medicare system, and it has suggested the elderly American population is less of a financial burden than expected.

PART 4

Questions 21–29

Read the following text for questions 21-29.

THE WILD SIDE OF TOWN

The countryside is no longer the place to see wildlife, according to Chris Barnes. These days you are more likely to find impressive numbers of skylarks, dragonflies and toads in your own back garden.

The past half century has seen an interesting reversal in the fortunes of much of Britain's wildlife. Whilst the rural countryside has become poorer and poorer, wildlife habitat in towns has burgeoned. Now, if you want to hear a deafening dawn chorus of birds or familiarise yourself with foxes, you can head for the urban forest. Whilst species that depend on wide open spaces such as the hare, the eagle and the red deer may still be restricted to remote rural landscapes, many of our wild plants and animals find the urban ecosystem ideal. This really should be no surprise, since it is the fragmentation and agrochemical pollution in the farming lowlands that has led to the catastrophic decline of so many species.

By contrast, most urban open spaces have escaped the worst of the pesticide revolution, and they are an intimate mosaic of interconnected habitats. Over the years, the cutting down of hedgerows on farmland has contributed to habitat isolation and species loss. In towns, the tangle of canals, railway embankments, road verges and boundary hedges lace the

landscape together, providing first-class ecological corridors for species such as hedgehogs, kingfishers and dragonflies.

Urban parks and formal recreation grounds are valuable for some species, and many of them are increasingly managed with wildlife in mind. But in many places, their significance is eclipsed by the huge legacy of post-industrial land — demolished factories, waste tips, quarries, redundant railway yards and other so-called 'brownfield' sites. In Merseyside, South Yorkshire and the West Midlands, much of this has been spectacularly colonised with birch and willow woodland, herb-rich grassland and shallow wetlands. As a consequence, there are song birds and predators in abundance over these once-industrial landscapes.

There are fifteen million domestic gardens in the UK, and whilst some are still managed as lifeless chemical war zones, most benefit the local wildlife, either through benign neglect or positive encouragement. Those that do best tend to be woodland species, and the garden lawns and flower borders, climber-covered fences, shrubberies and fruit trees are a plausible alternative. Indeed, in some respects, gardens are rather better than the real thing, especially with exotic flowers extending the nectar season. Birdfeeders can also supplement the natural seed supply, and only the millions of domestic cats may spoil the scene. As Britain's gardeners have embraced the idea of 'gardening with nature', wildlife's response has been spectacular. Between 1990 and the year 2000, the number of different bird species seen at artificial feeders in gardens increased from 17 to an amazing 81. The BUGS project (Biodiversity in Urban Gardens in Sheffield) calculates that there are 25,000 garden ponds and 100,000 nest boxes in that one city alone.

We are at last acknowledging that the wildlife habitat in towns provides a valuable life support system. The canopy of the urban forest is filtering air pollution, and intercepting rainstorms, allowing the water to drip more gradually to the ground. Sustainable urban drainage relies on ponds and wetlands to contain storm water runoff, thus reducing the risk of flooding, whilst reed beds and other wetland wildlife communities also help to clean up the water. We now have scientific proof that contact with wildlife close to home can help to reduce stress and anger. Hospital patients with a view of natural green space make a more rapid recovery and suffer less pain.

Traditionally, nature conservation in the UK has been seen as marginal and largely rural. Now we are beginning to place it at the heart of urban environmental and economic policy. There are now dozens of schemes to create new habitats and restore old ones in and around our big cities. Biodiversity is big in parts of London, thanks to schemes such as the London Wetland Centre in the south west of the city.

This is a unique scheme masterminded by the Wildfowl and Wetlands Trust to create a wildlife reserve out of a redundant Victorian reservoir. Within five years of its creation, the Centre has been hailed as one of the top sites for nature in England and made a Site of Special Scientific Interest. It consists of a 105-acre wetland site, which is made up of different wetland habitats of shallow, open water and grazing marsh. The site attracts more than 104 species of bird, including nationally important rarities like the bittern.

We need to remember that if we work with wildlife, then wildlife will work for us — and this is the very essence of sustainable development.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 Which type of wildlife benefits most from urban gardens?

A) wild plants
B) exotic flowers
C) wetland birds
D) woodland species

22 What type of garden plants can benefit birds and insects?

A) exotic flowers
B) shrubberies
C) reeds
D) fruit trees

23 In which way can wildlife habitats benefit people living in urban areas?

A) They can make the cities greener.
B) They can improve the climate.
C) They can promote human well-being.
D) They can extend the flowering season.

24 The writer believes that sustainable development is dependent on

A) urban economic policy.
B) large restoration schemes.
C) active nature conservation.
D) government projects.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 There is now more wildlife in UK cities than in the countryside.

A) True
B) False
C) Not Given

26 Rural wildlife has been reduced by the use of pesticides on farms.

A) True
B) False
C) Not Given

27 In the past, hedges on farms used to link up different habitats.

A) True
B) False
C) Not Given

28 New urban environments are planned to provide ecological corridors for wildlife.

A) True
B) False
C) Not Given

29 Public parks and gardens are being expanded to encourage wildlife.

A) True
B) False
C) Not Given

PART 5

Questions 30–35

Read the following text for questions 30-35.

LOCKED DOORS OPEN ACCESS

The word 'security' has both positive and negative connotations. Most of us would say that we crave security for all its positive virtues, both physical and psychological — its evocation of the safety of home, of undying love, or of freedom from need. More negatively, the word nowadays conjures up images of that huge industry that has developed to protect individuals and property from invasion by 'outsiders', ostensibly malicious and intent on theft or wilful damage.

Increasingly, because they are situated in urban areas of escalating crime, those buildings which used to allow free access to employees and other users (buildings such as offices, schools, colleges, or hospitals) now do not. Entry areas which in another age were called 'Reception' are now manned by security staff. Receptionists, whose task it was to receive visitors and to make them welcome before passing them on to the person they had come to see, have been replaced by those whose task it is to bar entry to the unauthorized, the unwanted or the plain unappealing.

Inside, these buildings are divided into 'secure zones' which often have all the trappings of combination locks and burglar alarms. These devices bar entry to the uninitiated, hinder circulation and create parameters of time and space for user access. Within the spaces created by these zones, individual rooms are themselves under lock and key, which is a particular problem when it means that working space becomes compartmentalized.

To combat the consequent difficulty of access to people at a physical level, we have now developed technological access. Computers sit on every desk and are linked to one another, and in many cases to an external universe of other computers so that messages can be passed to and fro. Here too, security plays a part, since we must not be allowed access to messages destined for others. And so the password was invented. Now correspondence between individuals goes from desk to desk and cannot be accessed by colleagues. Library catalogues can be searched from one's desk. Papers can be delivered to, and received from, other people at the press of a button.

And yet it seems that, just as work is isolating individuals more and more, organizations are recognizing the advantages of 'team-work'; perhaps in order to encourage employees to talk to one another again. Yet, how can groups work in teams if the possibilities for communication are reduced? How can they work together if e-mail provides a convenient electronic shield behind which the blurring of public and private can be exploited by the less scrupulous? If voice-mail walls up messages behind a password? If I can't leave a message on my colleague's desk because his office is locked? Team-work conceals the fact that another kind of security, 'job security', is almost always not on offer. Just as organizations now recognize three kinds of physical resources: those they buy, those they lease long-term, and those they rent short-term — so it is with their human resources. Some employees have permanent contracts, some have short-term contracts, and some are regarded simply as casual labour.

Telecommunication systems offer us the direct line, which means that individuals can be contacted without the caller having to talk to anyone else. Voice-mail and the answer-phone mean that individuals can communicate without ever actually talking to one another. If we are unfortunate enough to contact organizations with sophisticated touch-tone systems, we can buy things and pay for them without ever speaking to a human being.

To combat this closing in on ourselves we have the Internet, which opens out communication channels more widely than anyone could possibly want or need. An individual's electronic presence on the Internet is known as a 'Home Page' — suggesting the safety and security of an electronic hearth. An elaborate system of 3-dimensional graphics distinguishes this very 2-dimensional medium of 'web sites'. The nomenclature itself creates the illusion of a geographical entity, that the person sitting before the computer is travelling, when in fact the 'site' is coming to him. 'Addresses' of one kind or another move to the individual, rather than the individual moving between them, now that location is no longer geographical.

An example of this is the mobile phone. I am now not available either at home or at work, but wherever I take my mobile phone. Yet, even now, we cannot escape the security of wanting to 'locate' the person at the other end. It is no coincidence that almost everyone we see answering or initiating a mobile phone-call in public begins by saying where he or she is.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

The problem of physical access to buildings has now been **30**_____ by technology.

Messages are sent between **31**_____, with passwords not allowing other **32**_____ to read someone else's messages.

But, while individuals are becoming increasingly cut-off socially by the way they do their job, at the same time more value is being put on team **33**_____.

For questions 34-35, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

34 **According to the author, one thing we long for is ...**

A) the safety of the home
B) security
C) open access
D) positive virtues

35 **Buildings used to permit access to any users ...**

A) but now they do not
B) and still do now
C) especially offices and schools
D) especially in urban areas

MOCK TEST 47

35 answers

1 Initiative
2 Visa
3 Citizens
4 Days
5 Countries
6 Illegally
7 G
8 I
9 B
10 H
11 D
12 C
13 E
14 J
15 G
16 A
17 D
18 B
19 C
20 F
21 D / woodland species
22 A / exotic flowers
23 C / They can promote human well-being.
24 C / active nature conservation.
25 Not Given
26 True
27 True
28 Not Given
29 Not Given
30 solved
31 computers
32 people
33 work
34 B / security
35 A / but now they do not
