PART 1

Questions 1–6

Read the texts. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

WHAT'S IN A NAME

When naming a child, some parents seem to choose a name based simply on their personal preference. In other families, grandparents or professional name-makers come up with a child's name. And in some cases, the time of a child's birth influences how the child's **Q1**_____ is determined. In many European cultures, names are typically chosen by parents. Parents' choice for their child's name may be based on names of relatives or ancestors within their particular **Q2**_____. For example, in Italy, children are traditionally named after their grandparents. The **Q3**_____ generally use the father's parents' names first. If they have more children, then they will use the mother's parents' names. Similarly, some people in Eastern Europe name their children after relatives who have died. This tradition is seen as a means to protect the child from the Angel of Death.

Traditionally in some Asian countries, a child's grandfather or a fortune-teller chooses the child's name. In contrast to the **Q4** _____ of naming children after relatives, the child's name is chosen to influence the child's character. For example, names may be based on a connection to certain elements such as fire, water, earth, wood, or metal. Or the name might include a written character meaning beauty, strength, or kindness. In certain African cultures, when a child is born plays a large part in determining the child's name. In Ghana's Akan **Q5**_____ the day a child is born determines the child's name. But each day has different names for boys and girls. For instance, a **Q6** _____ born on Friday is named Kofi, whereas a girl born on the same day is named Afua. Both Kofi and Afua are names meaning 'wanderer' or 'explorer.' Children with these names are seen as travelers. No matter where the name comes from, a child's name is the first gift in life. Whether it is chosen according to preference or dictated by tradition, the name reflects something about a child's culture. For that reason, all names should be treasured and respected.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which situation described in the statements matches with each text. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use.

7

THE HARBOUR VIEW HOTEL — Tourist Board *** $100 PER PERSON PER NIGHT. Tours arranged. Private car park. Restaurant. All bedrooms en suite. Short bus ride from Sydney City Centre. Parties catered for. For reservations call: Tel: 0264125883

8

SUNRISE GUEST HOUSE — 1 STAR HOTEL. $49.99 Double room shared bathroom. 15 mins from beach. On bus route to City Centre. Surf equipment hire available. Modestly priced restaurant. Tel: 0241136386

9

SYDNEY'S BEST ACCOMODATION AGENCY — We can arrange all your needs for accommodation from budget to five star. Call: 0241523116. Or check our website at: www.stayinoz.com

10

THE ROYALE HOTEL — Sydney's most famous hotel. High class luxury rooms from $250 a night. All airport transfers arranged. 4 different restaurants. Private beach. 2 swimming pools. Functions arranged. For the luxury stay of a lifetime, call: Tel: 0241730938

11

SYDNEY YOUTH HOSTEL — ONLY $25 PER NIGHT! Dormitory sleeping. Shared bathrooms. Cheap restaurant. Television room. Travel advice. No Booking. 35 Gold Street Sydney. Just turn up. Tel: 0286141738. Rated 1* hotel

12

Golden Sands Beach Club — For only $150 a night. Golden beaches in Mallorca. Enjoy swimming activities in the Mediterranean. Take trips near villages. Enjoy shows and make friends. All meals and drinks are included in the price. Tel: 00679558

13

Seaview Hotel — Enjoy your time at wonderful, small luxury hotel in Spain. Prices include facilities: a swimming pool, tennis court and a gym. We organize trips to plays and concerts in the evenings. Beach is close to sit quietly and relax or read.

14

Hotel on the sea — Enjoy two weeks of luxury on this cruise around the Mediterranean visiting seven popular destinations. Relax in the sunshine by the ship's swimming pool. You won't get bored, as there are cinemas, tennis courts and a theatre on board, plus plenty of social activities in the evening. Tel: 665923258

A) You cannot make an advanced reservation for this hotel.

B) You must pay a bit more but can stay in a luxury room.

C) You don't have to pay for food and beverages if you stay in this hotel.

D) You can go on safari trips there.

E) You can stay in only one type of bedroom there.

F) Which advertisement is NOT for a hotel?

G) You don't pay for recreation facilities in this hotel.

H) This hotel takes you to many cities.

I) Hotel managers are all multilingual.

J) You can rent swimming equipment in this hotel.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once.

List of Headings:

A) Behind the Wheel
B) Pessimistic Predictions
C) Intelligent House
D) New Possibilities for Business
E) Permanent People
F) Greenhouse Effect
G) Easy Shopping
H) Future Entertainment

15. Paragraph I **16. Paragraph II** **17. Paragraph III**
18. Paragraph IV **19. Paragraph V** **20. Paragraph VI**

LIST OF HEADINGS

I. The smart fridge will be connected to the Internet as part of a home network that runs your domestic life, interacting with the barcodes on your food, and reordering them online as you use them. Virtually all domestic appliances will be linked by computer, so that the fridge can communicate with the cooker and rubbish bin, coordinating complex tasks such as cooking a meal.

II. Children of the future will never be able to complain that there's no one to play with. Equipped with virtual reality headsets, they will be taking part in global games, for example, in medieval jousting tournaments. Their opponents, selected by the computer, will probably live on the other side of the world.

III. Cars of the future will take much of the strain out of driving. The intelligent navigation system will be able to choose the best route for you by monitoring an online traffic database for holdups, while the cruise control keeps a constant distance from the car in front. And if you exceed the speed limit, the speedometer will give a polite warning to you.

IV. Holographic conferencing and virtual reality meetings will allow people to interact with colleagues and clients via computer, without needing to leave the comfort of their own homes. This will also mean that a lot more people will either work freelance from home, or on flexible short-term contracts. The old concept 'jobs for life' will be a thing of the past.

V. In the future it will become harder to tell the difference between the human and the machine. All body parts will be replaceable. A computer will function like the human brain with the ability to recognize feelings and respond in a feeling way. We will then be able to create a machine duplicate of ourselves and transfer our spirit so we will be able to live for as long as we want.

VI. There will be great changes to the environment particularly because of the rising sea levels. Global warming is expected to cause oceans to rise by one meter, which will increase the risk of flooding. It will happen regardless of any future actions to curb greenhouse gases. Projected climate change will also tend to degrade water quality through higher water temperatures.

PART 4

Questions 21–29

Read the following text for questions 21-29.

INTERNET SAFETY ISSUES

The fact is that 93 percent of kids are online. Even if parents limit or ban internet access, kids have access at school, through a friend's smart phone, libraries, and schools. The internet is a tool that our children need to use and master with wisdom dispensed by parents. We need tech-savvy youth who will grow up to be leaders of the community. Many schools use web sites such as EdModo to connect students and teachers.

My friend Reem is the vice principal of an Islamic School. She says that many teachers assign work from school that children need to research online. Some of the best homeschooling resources are online. Far too many parents do not allow their children monitored access to the internet, leading to two scenarios. Their children end up lying and using it behind their back; or are so sheltered that they do not know how to conduct themselves online when they finally do get access. On the other hand, more often than not, there are parents who freely give unmonitored access. But caretakers raising children in today's world need to think about several issues:

- How does a parent know if his/her child is engaging in inappropriate Internet activities?
- How would a parent know if his/her child is cyber-bullied if he or she does not tell them?

According to Common Sense Media, 'Young teens don't yet have an off switch in their brains. That means that they often act impulsively. This lack of impulse control, combined with online anonymity, could lead toward dangerous behaviors: cyber-bullying, inappropriate photo or video uploads, illegal downloads, meeting strangers — even cheating. Because socializing is so important to young people, online interactions can become pretty intense — whether they're playing games, chatting with friends, or sharing work.' Using open communication and thoughtful intervention, parents can help their wired offspring learn how to maneuver electronic gadgets and the World Wide Web. Here are some tips on how to give children monitored access to the Internet:

- spend time with your children online.
- ask to see their Facebook page, their Instagrams, and Twitter feed.

It may seem like a foreign territory, but it is imperative that parents talk to their children about social media. At this stage, it is not our job to try to protect them by isolating them. It is our job to teach them how to deal with information and with people.

- younger children often play on websites such as Movie Star Planet, Moshi Monsters, and new ones pop up every day. Most of these sites teach extreme consumerism as children

play to accumulate points or currency and use it to 'buy' stuff: furniture, VIP passes, etc.; urging your child to become 'Rich and Famous.' As responsible parents, we need to prevent children from becoming mindless consumers. If you do allow your child to visit these sites, then watch them while they play

- teach them not to talk to or chat with random strangers. That person with a name Girlie45 could, possibly, be a middle-aged predator. Teach them that everything that they put online is there forever. Anyone can cut, copy and paste pictures and text. Teach them how to be safe online because today it is as important as safety basics about locking the door or not playing with matches.

For questions 21-24, choose the correct answer A, B, C, or D.

21 What does the author think about the educational value of prohibiting children from the internet?

A) It is useless.
B) It is important.
C) It is effective.
D) It is advisable.

22 What way of using the internet in education does the author mention (paragraph 2)?

A) Finding ready-made research papers.
B) Online instruction by the school administration.
C) Communication platform for teachers and students.
D) Teaching from home.

23 According to the text, the best way to protect children from internet hazards is to..

A) monitor their accounts on social networks.
B) follow them online.
C) ban them from using social networks.
D) limit their access to the computer.

24 The danger of online games is, according to the author, in...

A) the possibility of losing one's money.
B) availability of VIP passes.
C) getting used to spending money easily.
D) their accessibility.

For questions 25-29, decide if the following statements agree with the information given in the text.

25 Some schools have a special system that allows students and teachers make communication with each other.

A) True
B) False
C) Not Given

26 Children face no difficulty in adjusting to the internet after removing the ban to use.

A) True
B) False
C) Not Given

27 All parents usually control the access of their children to the internet.

A) True
B) False
C) Not Given

28 Parents were advised to create a Facebook account to chat with their children online.

A) True
B) False
C) Not Given

29 Children should learn how to use the internet safety from their parents.

A) True
B) False
C) Not Given

PART 5 Questions 30–35

Read the following text for questions 30-35.

ASTRONOMERS' NEW HOME IN THE ANDES

It is dawn in the Andes. A grimy carpet of red dust stretches over rolling featureless hills towards a horizon dominated by the icy cone of Chile's Licancabur volcano. There are no trees, no bushes, not even a blade of grass in this lifeless landscape. Even the atmosphere is alien. At 5,000 metres above the sea, oxygen levels are puny. Move suddenly, and bright spots blur your vision before you start to stagger and retch. This is Chajnantor, the most inhospitable portion of Chile's Atacama desert, and one of the most world's arid places. The annual rainfall here is negligible — a few drops of moisture scattered yearly on desiccated, empty land. You wouldn't last a day unprotected in this dead zone. It is hostile, threatening, and in a few years is destined to provide astronomers with a new home.

It is extraordinary. Nevertheless, the European Southern Observatory has committed itself to begin building an array of giant microwave receivers on Chajnantor. When completed, these machines will allow the world's astronomers to view the birth of thousands of planetary systems in the deepest recesses of our galaxy and probe the early universe's 'Dark Ages', when dust obscured the cosmos and the first stars flickered into existence. Unique knowledge is expected to flow from Alma, the Atacama Large Millimetre Array.

Each Alma receiver will consist of a transportable structure supporting a dish measuring 10 metres in diameter. Extending outwards from the smooth metal surface of the dish will be three support arms that hold a sub-reflector. This will direct the radio waves down into the heart of the receiver, where signals can be amplified, recorded and analysed. To vary its angle it will be mounted on an elevation structure, beneath which will be around on the steel base, the cylindrical platform for the receiver.

Scientists are now satisfied they know about the universe's birth and about its childhood. But they still need to learn about its early infancy thirteen billion years ago, after the newly-born cosmos had exploded into existence and the heavens had filled with superheated particles, a thin gruel of matter that somehow coalesced to produce heavy solid objects. 'We want to know how a hot, fluid universe turned into one with galaxies and stars and planets and continents and, eventually, people,' says UK astronomer Dr. Paul Murdin. 'We want to know how heavens got structure. In short, we want to understand how we got from the Big Bang to people.' 'One answer is to build even bigger optical telescopes to gather photons from even more distant — and therefore older — objects. However, really distant galaxies

recede from us so rapidly that much of their light transformed — by an effect as the Doppler shift — into microwave radiation.

And that is why Chajnantor is so important. Its receivers will be built specifically to collect this precious microwave radiation and help astronomers to understand one of science's last major cosmological mysteries: the structured, solid nature of the cosmos. But collecting microwave radiation has one major drawback, as Esteban Illanes, of the European Southern Observatory, explains. 'It is absorbed by water. An observatory at sea level would pick up nothing. All the microwaves coming down from space would have absorbed by clouds or water vapor in the atmosphere before they reached our instruments. That is why we picked Chajnantor. It is high and dry — perfect for picking up microwaves.'

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and/or A NUMBER for each question.

The lack of **30** _____ makes Chajnantor one of the driest areas in the globe.

One feature of the Alma telescopes is they are **31** _____

Dr. Paul Murdin's final aim is to reveal how **32** _____ came into existence.

In Chajnantor, scientists can receive more microwaves as in this place **33** _____ can not take in them.

For questions 34-35, choose the correct answer A, B, C, or D.

34 **According to the information given in the reading passage, which is the feature of Chajnantor?**

A) completely flat land
B) unfriendly local people
C) intense heat during the day
D) a total lack of vegetation

35 **Which of these reasons is given by the writer for sitting telescope at Chajnantor?**

A) to minimize the effect of Doppler shift
B) to avoid the limitations of optical telescope
C) to discover how the universe began.
D) to see how the universe was changing ten billion years ago.

MOCK TEST 55

35 answers

1 name
2 family / families
3 parents
4 tradition
5 culture
6 boy / boys
7 E
8 J
9 F
10 B
11 A
12 C
13 G
14 H
15 C
16 H
17 A
18 D
19 E
20 B
21 A / It is useless.
22 C / Communication platform for teachers and students.
23 B / follow them online.
24 C / getting used to spending money easily.
25 True
26 False
27 False
28 Not Given
29 True
30 rainfall
31 transportable
32 people
33 water
34 D / a total lack of vegetation
35 B / to avoid the limitations of optical telescope
