PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

SCIENTISTS CHANGE PLANTS' SUNBLOCK

Biologists have thought of a new way to increase the size of crops by 20 per cent. They genetically modified the thing in plants that is responsible for photosynthesis. **Q1**_____ is the important chemical reaction where plants use sunlight to change carbon dioxide into oxygen. It lets us breathe. The scientists found a way for **Q2**_____ to use the energy they get from sunlight better, so they produce more food. Lead researcher Professor Stephen Long said his team is **Q3**_____ modifying the world's biggest crops, such as rice, wheat, maize and soybean.

The **Q4**_____ changed the thing that plants use to protect themselves from damage from the Sun's strongest rays. Plants turn their **Q5**_____ into heat when they become too hot. However, plants do this even when clouds block the Sun. The scientists put extra copies of the heat-loss genes into plants. These speed up the heat-loss process so the plants can quickly return to using energy to grow. This could help the world's food needs. Professor Long said if he could get 20 per cent more **Q6**_____ from crops, it would reduce the future pressure on food supply.

PART 2

Questions 7–14

Read the texts 7-14 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are TWO extra statements which you do not need to use. Mark your answers on the answer sheet.

A) **Davidson's** This traditional-looking store opened in 1860, and still offers high-class, fashionable goods at reasonable prices, with many made from natural materials. The men's clothes are particularly recommended, and there's also an area selling nothing but beautiful jewellery. And on fine days, try the rooftop restaurant – the food is fantastic.

B) **Bartons** If you're in town looking for a bargain don't forget to pay us a visit. Situated in the heart of the shopping mall, our popular sale has everything for the professional man, including suits, shirts and shoes. Don't forget our roof-top café! Late-night shopping Monday to Friday.

C) **Hallwick's** People often visit Hallwick's just for the displays of lights that make it so attractive to shop here. And it was the first to sell clothes made of pure, natural cotton, grown in conditions that avoid creating pollution. The assistants are polite and will help with any questions about goods.

D) **Design Corner** We're a new shop in the old part of town and away from the crowds. But there's nothing old about our goods. We sell dresses, skirts and blouses made by local designers, and beautiful posters, pens and pencils that will look great in the office or on a student's desk.

E) **Stafford's** This store is popular for its range of good-quality sportswear at very reasonable prices, which is hard to find elsewhere. And on the ground floor, you'll find displays of their famous handmade candies – great for celebrations! And Stafford's is always the first to offer new designs in men's and women's clothing, too!

F) **Henry's** Henry's is known for its high-quality clothing, as our users' comments prove, whether that's dresses, skirts or stylish suits. Our highly experienced staff will measure you and make sure you get the perfect fit. A little more expensive than the high street shops but worth every penny.

G) **Crozier's** This store is in a beautiful new building. One floor is full of toys and board games like chess, and downstairs there's a huge variety of cakes, sweets and also fresh food that's perfect for making a meal! The roof garden is popular here in summer, and the friendly staff serve delicious lunches.

H) **Barton's** Barton's has been here since it opened in 1930, and still has its huge glass door and beautiful windows. The first floor is fantastic for children, as it's packed with things to play with – at reasonable prices. And downstairs, you'll find a huge selection of amazing fresh food rarely found elsewhere.

I) **Wedges** Take a break while you're shopping and try our delicious home-cooked hot meals. Popular with students, everything is reasonably priced. While you're here have a look at some of the second-hand clothes we have available.

J) **Stella's Boutique** Late-night shopping in Stella's boutique. Many of our clothes are on special offer, with some items two for the price of one. Visitors can also enjoy locally made cakes and snacks in our café. Just a short two-minute walk from the train station.

7

Jasmine would like to find a store where they can eat outside, and her dad wants somewhere known for its good-quality suits. They also want to buy a necklace for Jasmine's mum.

8

Peter wants to buy some special sweets for his grandma's birthday, and his older sister, Nell, wants to see the latest women's fashions. They also need to buy new tennis T-shirts, without spending a lot.

9

Jim wants to buy some new shoes for work. He needs something reasonably cheap and, as he's working long hours, he needs a shop that is open late during the week.

10

Hamid wants a shop where he can get measured for a new suit. He is happy to spend quite a lot but wants a place that has been recommended by other customers.

11

Maria wants a store selling clothes that use materials produced without damaging the environment. Her mum would like somewhere that has great customer service and is beautiful inside.

12

John enjoys cooking, and wants to buy some unusual ingredients. His parents like stores that have been in the same buildings since they were young, and that have great toys for John's young sister.

13

Sheila wants to go shopping after she finishes work. She wants to buy an inexpensive dress or a skirt and would like to eat something made locally before her train leaves.

14

Natalie is looking for a gift for her daughter who has passed her exams. She'd like to buy her something for university and wants to avoid the busy shopping centre.

PART 3

Questions 15–20

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once. Mark your answers on the answer sheet.

List of Headings:

1) Musical performance
2) Attractive landscape
3) Perfect holidays
4) Portrait of a girl
5) Film for all ages
6) Exciting hobby
7) Colourful festival
8) Interesting book

15. Paragraph A **16. Paragraph B** **17. Paragraph C**
18. Paragraph D **19. Paragraph E** **20. Paragraph F**

READING

A. This is a full-length (ninety minutes) cartoon, which is entertaining for both adults and children over six. The animation and colour are of very high quality and the story has lots of fun and excitement. The plot is quick moving and full of surprises. There's romance, action, comedy, music and lots of fantastic songs and dances.

B. This is a full-blooded magnificently written portrait of history's most fascinating woman. Readers will lose themselves for hours in this richly entertaining novel full of dramatic twists and turns. From the spectacular era that bears her name comes the spellbinding story of Elizabeth I – her tragic childhood, her confrontation with Mary, Queen of Scots and her brilliant reign.

C. The young woman is shown in a "shepherdess" hat and white dress, recalling a classical chiton. The background landscape, common in such paintings, seems to indicate the heroine's closeness to nature, to the ordinary joys of life. The painter's colour range – at times as translucent as porcelain, at others muted like mother-of-pearl – is based upon subtle plays of gray and green, light blue and pink.

D. In this picture one is struck by the artist's absolute mastery in portraying natural details, whether the dry, sandy soil of the forest, the clear stream of water in the foreground, the yellow bark and fluffy needles of the pines, or the sense of a bright, clear, calm summer day. The artist managed to create an image familiar to anyone who has seen a Russian forest.

E. Have a good time on the most lively and exciting island in the Caribbean. Relax under a palm tree on the white sandy beaches. Swim in the clear, blue sea. Listen to the bands playing Calypso music. Or get really adventurous and go scuba diving for sunken treasure on the sea bed. Join in the many cultural celebrations we offer, for example the sugar harvest festival.

F. This event is considered the greatest attraction for visitors to the Isle of Man. No definite date can be given, but it is normally held between 5th and 15th July. The Pageant begins at about 8 p.m. First we are given a glimpse of village life in Celtic times. Then suddenly Viking long ships appear and then there are scenes of war. Then Celts and Vikings unite, and the Manx nation is born. The actual Pageant is followed by a grand torchlight procession and firework display.

PART 4

Questions 21–29

Read the following text for questions 21-29.

THE INTRODUCTION TO A NEW BIOGRAPHY

Alexander Pushkin was not only Russia's greatest poet, but he was also the great-grandson of an African slave. The slave, whose godfather was Peter the Great, claimed to have royal blood of his own. Certainly his Russian descendants believed that he was an African prince. His descendants have included members as well as close friends of the English royal family. So the legend goes on.

Pushkin told the story of his black ancestor in 'The Negro of Peter the Great', but this biography tells a different version. The main difference is between fact and fiction. The Russian poet hoped to discover a biographical truth by sticking to the facts, only to discover that facts are slippery and not always true. His biography turned into a novel. Even then, it was left unfinished after six and a half chapters. The scrawled manuscript comes to an end with a line of dialogue – 'Sit down, you scoundrel, let's talk!' – and a line of dots. Pushkin could be speaking to himself. In any case, it's now time to stand up and carry on with the story. I have tried to join up the dots.

This is a book, then, about a missing link between the storyteller and his subject, an African prince; between the various branches of a family and its roots; between Pushkin and Africa; Africa and Europe; Europe and Russia; black and white. It is the story of a remarkable life and it poses the question: how is such a life to be explained?

My own explanation began in 2001, while I was living in Russia and working there as a journalist. The first draft was written during the war in Afghanistan, on the road to Kabul, but it describes my journey to the frontline of a different kind of war in Africa between the armies of Ethiopia and Eritrea. According to legend, Pushkin's ancestor was born there, on the northern bank of the River Mareb, where I was arrested for taking photographs and compass readings, on suspicion of being a spy.

Our lives today would be very different if Thomas Edison had never lived. Born in 1847, Edison became the most active of all inventors in the late 19th and early 20th centuries. His inventions influenced life all around the world.

Edison's teachers at school did not recognize his brilliance. In fact, they considered him a rather bad student. Fortunately, his mother thought differently. She took him out of school and taught him at home, which is when he developed his two lifetime passions: reading and experimenting.

His first job was as a telegraph operator, and his first important inventions were improved telegraphic devices. But he first became famous for the phonograph, invented in 1877. Today, in the age of MP3 players, it's hard to imagine how magical the phonographic recording was. The public loved the new machine and a form of it was used well into the late 20th century.

Edison is often credited as the inventor of the light bulb, though, of course, many people worked on the idea both before and after him. In 1878 he formed the company Edison Electric Light Company and in 1879 introduced his improvements to the incandescent light bulb. At about this time, he became famous for saying, "We will make electricity so cheap that only the rich will burn candles." His inventions also influenced the development of radiology and the first motion picture cameras.

For questions 21-24, choose the correct answer A, B, C, or D. Mark your answers on the answer sheet.

21 The slave's Russian descendants believe that the slave
A) had Russian royal blood in him.
B) was Peter the Great's godfather.
C) belonged to the royal family in his native land.
D) was a close friend of the English royal family.

22 According to the narrator, the biography of Pushkin's ancestor turned into a novel because Pushkin
A) didn't like the true biographical facts he had discovered.
B) found it impossible to stick to the facts that were doubtful.
C) could not do without describing fictional events.
D) found the true facts of the slave's biography uninspiring.

23 The narrator's objective in writing the book was to
A) write a new version of the novel 'The Negro of Peter the Great'.
B) continue the story from where it was left unfinished.
C) interpret the storyteller's attitude to his ancestor.
D) prove that Pushkin's ancestor was an African prince.

24 The narrator says that his research for the book
A) brought him to Russia to work as a journalist.
B) made him go to the war in Afghanistan.
C) led him to take part in the war in Africa.
D) brought him to a river bank in Africa.

For questions 25-29, decide if the following statements agree with the information given in the text. Mark your answers on the answer sheet.

25 The inventions of Thomas Edison still have an enormous influence on our life.
A) True
B) False
C) Not Given

26 Edison was taught at home because of his health problems.
A) True
B) False
C) Not Given

27 Edison was fond of reading and science since childhood.
A) True
B) False
C) Not Given

28 When it was first invented, phonograph struck people as a magical thing.
A) True
B) False
C) Not Given

29 Edison was against burning candles.
A) True
B) False
C) Not Given

PART 5 Questions 30–35

Read the following text for questions 30-35.

RESEARCH ON IMPROVING AGRICULTURAL YIELDS IN AFRICA

More than half of the global population growth between now and 2050 is expected to occur in Africa. And more people means a requirement for more food.

Ethiopia, for example, has the largest livestock population in Africa but with a growing population, even its 53 million cattle are not enough. And now efforts to develop farming there are bringing a significant health concern. Professor James Wood from the University of Cambridge explains that new breeds that are being introduced are more vulnerable to bovine TB (tuberculosis) than the zebu cattle which were previously reared there. 'This may have health implications for those who work with and live alongside infected cattle, and also raises concerns about transmission to areas which previously had low levels of TB,' he warns.

Wood leads a research programme which is looking at the feasibility of control strategies, including cattle vaccination. The programme brings together veterinary scientists, epidemiologists, geneticists, immunologists and social scientists in eight Ethiopian and UK institutions. 'We need this mix because we are not only asking how effective strategies will be, but also

whether farmers will accept them, and what the consequences are for prosperity and wellbeing,' says Wood.

The impact that increasing productivity can have on farmers' livelihoods is not lost on an insect expert at the University of Ghana, Dr Ken Fening, who is working on another food-related research project. Cabbages are not indigenous to Africa but have become a major cash crop for Ghanaian farmers and an important source of income for traders from markets and hotels. 'A good crop can bring in money to buy fertilisers and farm equipment, and also help to pay for healthcare and education for the family,' he says. Recently, however, fields of stunted, yellowing cabbages, their leaves curled and dotted with mould, have become a familiar and devastating sight for the farmers of Ghana.

From his field station base in Kpong, Ghana, Fening works closely with smallholder farmers on pest-control strategies. Two years ago they started reporting that a new disease was attacking their crops. 'It seemed to be associated with massive infestations of pink and green aphids,' says Fening, 'and from my studies of the way insects interact with many different vegetables, I'm familiar with the types of damage they can cause.'

What's more, the virus was not what they expected, and work is now ongoing to identify the culprit. The sooner it can be characterised, the sooner sustainable crop protection strategies can be developed to prevent further spread of the disease not only in Ghana, but also in other countries in the region. Another researcher who hopes that eradication strategies will be the outcome of her research project is Dr Theresa Manful. Like Fening, she is a researcher at the University of Ghana. She has been working with Cambridge biochemist Professor Mark Carrington on a disease known as trypanosomiasis.

'This is a major constraint to cattle rearing in Africa,' she explains. 'Although trypanosomiasis is also a disease of humans, the number of cases is low, and the more serious concerns about the disease relate to the economic impact on agricultural production.'

The parasite that causes the disease is carried by the tsetse fly, which colonises vast swathes of sub-Saharan Africa. Carrington says that a lot is now known about the parasite's molecular mechanisms, in particular the way it evades the immune system of the animal acting as its host by altering the proteins in its coat so as to remain 'invisible'. 'But then when you look at the effect on large animals, you realise that there is almost nothing known about the dynamics of an infection, and even whether an infection acquired at an early age persists for its lifetime,' he says. So Manful and Carrington set about testing cattle in Ghana. They discovered that nearly all were infected most of the time.

For questions 30-33, fill in the missing information in the numbered spaces. Write no more than ONE WORD and / or A NUMBER for each question.

Trypanosomiasis is a disease caused by a parasite which is spread by an insect called the **30** _____ fly. The parasite can remain unaffected by the host's **31** _____ system because it is able to change the **32** _____ on its outer covering. It is uncommon among humans but has been found to affect most **33** _____ in Ghana.

For questions 34-35, choose the correct answer A, B, C or D. Mark your answers on the answer sheet.

34 What is the main problem faced by cattle farmers in Ethiopia, according to Professor Wood?

A) TB is being transmitted from people to cattle.
B) New breeds of cattle have led to an increase in TB.
C) The traditional breeds of cattle are being affected by TB.
D) TB has spread into places where it was previously unknown.

35 When discussing the cultivation of cabbages in Ghana, the writer says that this crop

A) was introduced from outside Africa.
B) is not eaten much by local people.
C) is not grown correctly by many farmers.
D) requires the use of fertiliser and special equipment.

MOCK TEST 61

35 answers

1 photosynthesis
2 plants
3 genetically
4 scientists
5 energy
6 food
7 A
8 E
9 B
10 F
11 C
12 H
13 J
14 D
15 5
16 8
17 4
18 2
19 3
20 7
21 C / belonged to the royal family in his native land.
22 B / found it impossible to stick to the facts that were doubtful.
23 B / continue the story from where it was left unfinished.
24 D / brought him to a river bank in Africa.
25 True
26 False
27 True
28 True
29 Not Given
30 tsetse
31 immune
32 proteins
33 cattle
34 B / New breeds of cattle have led to an increase in TB.
35 A / was introduced from outside Africa.
