⏱ 60 minutes

Vaqt: 60 daqiqa. Javoblarni javoblar varaqasiga o'tkazishni unutmang.

PART 1 — Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

MOSQUITOES

Mosquitoes like some people more than others. Scientists in the USA found that different body smells attract **Q1**_____. This includes our natural body odour and smells from soaps. Some of these smells could reduce the number of bites we get in the summer. The researchers said mosquitoes preferred soap with a flowery smell. More than 60 per cent of the **Q2**_____ coming from our body come from soap. Changing the soap we use could stop us being attractive to mosquitoes. **Q3**_____ with no smell could make us less tasty to mosquitoes. The **Q4**_____ tested four popular brands of soap on mosquitoes. They also tested the smell of people when they did not wash themselves. The researchers put the soapy and unwashed smells in two different cups in a cage full of mosquitoes. The insects preferred the soapy smells. Mosquitoes are like humans because they like **Q5**_____ and fruity smells. One researcher said coconut-scented soap is best to keep mosquitoes away. Mosquitoes are the world's deadliest creatures. The diseases they carry kill 725,000 **Q6**_____ a year.

PART 2 — Questions 7–13

Read the texts 7-13 and the statements A-J. Decide which text matches with the situation described in the statements. Each statement can be used ONCE only. There are THREE extra statements which you do not need to use. Mark your answers on the answer sheet.

A) This wallet will suit people who prefer natural materials.

B) Items in this suitcase will not be affected if it gets wet.

C) This wallet would suit someone who needs to keep several passports together.

D) This wallet has been specially made to prevent people detecting the numbers on any bank cards, etc. inside it.

E) It is easy to choose one of these suitcases to match most clothing.

F) This will suit people who want to be able to find their document wallet easily in their luggage.

G) Parts of the inside of this wallet have categories printed on them in one colour.

H) This suitcase is for those who wish to purchase expensive luggage.

I) Something to keep this wallet in is provided.

J) Those who want to be reminded of an earlier age of travel will like this suitcase.

7

Lifeventure Mini Travel Document Wallet This is a waterproof wallet, which uses anti-RFID (radio frequency identification) material so your financial details will be safe. It is black with smart sky-blue finishing touches and has a small internal compartment, a smartphone pocket and an external pocket. It can fit two passports.

8

Cath Kidston Breton Stripe A wallet so slim it could easily pass for a small notebook. The inside compartment labels identifying each separate section all have silver lettering on them. The wallet has a special coating which makes it easy to wipe anything like sand off.

9

Ted Baker Voyager's Travel Wallet This wallet comes in smooth black leather, and is no bigger than a passport, but roomy enough for any insurance documents or flight tickets. A small navy-blue pen is supplied inside.

10

Radley Abbey Travel Wallet This plain travel wallet opens up to reveal pockets in various colours labelled 'cards', 'passport' and 'tickets', as well as others left blank for extras. It comes in a handy drawstring bag.

11

Gotravel Organiser The black wallet features seven slip-in card compartments, two small interior zip pockets and a load of other slip-in compartments. It can fit at least four passports.

12

Gotravel Glo Travel Wallet This is a simple, very reasonably priced wallet. It is made of PVC plastic and will suit those who like a wallet that is easy to spot. It comes in a range of bright colours with a white holiday-related design on the front. It has five compartments that can fit a passport with other cards/tickets.

13

Briggs and Riley Weekender A weekend suitcase that's sophisticated and unusually spacious for its type. The strong nylon outer fabric is water and abrasion resistant, so it should handle any knocks without showing signs of damage.

PART 3

Questions 14–21

Read the text and choose the correct heading for each paragraph from the list of headings below. There are more headings than paragraphs, so you will not use all of them. You cannot use any heading more than once. Mark your answers on the answer sheet.

List of Headings:

I) Failing relationships and negative feelings
II) Winning the lottery may not make you happier
III) What is Hedonic Adaptation?
IV) Philanthropy benefits the giver
V) Wealth management issues
VI) Spend your winnings wisely
VII) What you do, not what you buy
VIII) Behavioral Changes
IX) Case of Lisa Arcand

14. Paragraph A **15. Paragraph B** **16. Paragraph C**
17. Paragraph D **18. Paragraph E** **19. Paragraph F**
20. Paragraph G **21. Paragraph H**

READING

A. This is partially due to a phenomenon called hedonic adaptation or the hedonic treadmill. This describes our tendency to become used to the happiness after experiencing it for the first time. For example, landing the job that you have always wanted may give you happiness but the thrill wears off after a certain period of time. Though it may sound a little bit counterintuitive, hedonic adaptation helps us maintain a steady and emotional equilibrium which makes us less sensitive to any changes including negative events. This phenomenon allows us to revert back to our default emotional state after experiencing high levels of emotion whether good or bad.

B. Piecing together this information, winning the lottery would make you happy but only for a short period of time. After getting used to the luxuries of having enough funds for grandiose homes, better food, and nicer clothes, we go back to how we used to feel before we won the prize. Therefore, winning the lottery doesn't guarantee happiness, in fact, lottery winners even reported being unhappy after they have won the prize.

C. One of the reasons why this is so is because large sums of money can be a lot to manage. Take for example the case of Lisa Arcand from Massachusetts. She won $1 million in 2004 and like all winners, she went on lavish vacations and bought a nice house. However, a million dollars isn't much for taxes; she even opened a restaurant to keep the cash flowing but to no avail, losing everything in 2007. Another example is Michael Caroll who turned from lottery winner to factory worker, even after winning £9.7 million in 2002. Janite Lee, Willie Hurt, and Lou Eisenberg, are just some of the many names that have won the lottery but went from rags to riches and back to rags because of poor financial decisions.

D. Aside from difficulty in managing finances, winning the lottery can be an isolating experience. Unwanted attention and unwanted requests for money from peers can make us paranoid and anxious. Eventually, lottery winners wind up cutting themselves from others because of the fear of being used as a just a source of money than a source of friendship.

E. While the constant fear of losing everything can haunt lottery winners, some even become greedier than they were before winning. A study conducted by social- psychologist Paul Piff at the UC Berkeley Campus in California, proves that gaining wealth can actually change our behaviour drastically. Using a rigged game of Monopoly, Piff chose a player at random to play the game at a certain advantage such as more starting money, and better ability to move around the board. In just after 15 minutes, the advantaged players displayed dramatic change in behaviour including forceful movement of boardgame pieces, speaking louder, and even minute things such as eating more snacks compared to other players.

F. Winning the lottery will make you happy but thanks to hedonic adaptation, the thrill and excitement of spending all that cash won't last long. While most of us would indulge in a fabulous lifestyle after winning, there are ways that winning the lottery can make us happier than having the latest supercar in your garage. It's that old saying it's not what you have, but what you do that counts. The key to happiness, it seems, is to invest in experiences. Think carefully before you start spending.

G. Having a lot of money can open new opportunities for us to enjoy life more than just having expensive things. With hedonic adaptation embedded in our systems, finding what really guarantees happiness can be a hurdle on the way. However, findings show that people tend to adapt faster to extrinsic and material things than we do on experience. Travelling, exploring, and even learning a new skill, gives us more gratification than having the latest clothes from your favourite designer or luxury brand. Therefore, investing in experiences makes us happier than investing in things.

H. Another thing that would help you convert your money into happiness is through charity. Believe it or not, giving others provides more happiness than spending it on yourself. A study by the University of British Columbia and Harvard Business School proved that spending more on others provides more happiness than spending it on yourself. Participants were asked to spend money however they wish, be it on themselves or unto others. Afterwards, a survey was conducted to rate their level of happiness. The group who donated their money to charity feel happier than those who spent it on themselves. While having money does make us happy today, it doesn't guarantee our happiness in the long-run. Thanks to hedonic adaptation, we get used to the emotions that we feel but we can get around it by making every penny count - not on materialistic things - but on experiences and by giving back to the community.

PART 4

Questions 22–29

Read the following text for questions 22-29.

BRITAIN NEEDS STRONG TV INDUSTRY

Comedy writer Armando Iannucci has called for an industry-wide defence of the BBC and British programme-makers. "The Thick of It" creator made his remarks in the annual MacTaggart Lecture at the Edinburgh TV Festival. "It's more important than ever that we have more strong, popular channels... that act as beacons, drawing audiences to the best content," he said. Speaking earlier, Culture Secretary John Whittingdale rejected suggestions that he wanted to dismantle the BBC. 'Champion supporters' Iannucci co- wrote "I'm Alan Partridge", wrote the movie "In the Loop" and created and wrote the hit "HBO" and

"Sky Atlantic show Veep". He delivered the 40th annual MacTaggart Lecture, which has previously been given by Oscar winner Kevin Spacey, former BBC director general Greg Dyke, Jeremy Paxman and Rupert Murdoch. Iannucci said: "Faced with a global audience, British television needs its champion supporters." He continued his praise for British programming by saying the global success of American TV shows had come about because they were emulating British television. "The best US shows are modelling themselves on what used to make British TV so world-beating," he said. "US prime-time schedules are now littered with those quirky formats from the UK - the "Who Do You Think You Are"'s and the variants on "Strictly Come Dancing" - as well as the single-camera non-audience sitcom, which we brought into the mainstream first. We have changed international viewing for the better." With the renewal of the BBC's royal charter approaching, Iannucci also praised the corporation. He said: "If public service broadcasting - one of the best things we've ever done creatively as a country - if it was a car industry, our ministers would be out championing it overseas, trying to win contracts, boasting of the British jobs that would bring." In July, the government issued a green paper setting out issues that will be explored during negotiations over the future of the BBC, including the broadcaster's size, its funding and governance. Primarily Mr Whittingdale wanted to appoint a panel of five people, but finally he invited two more people to advise on the channer renewal, namely former Channel 4 boss Dawn Airey and journalism professor Stewart Purvis, a former editor-in-chief of ITN. Iannucci bemoaned the lack of "creatives" involved in the discussions.

"When the media, communications and information industries make up nearly 8% our GDP, larger than the car and oil and gas industries put together, we need to be heard, as those industries are heard. But when I see the panel of experts who've been asked by the culture secretary to take a root and branch look at the BBC, I don't see anyone who is a part of that cast and crew list. I see executives, media owners, industry gurus, all talented people - but not a single person who's made a classic and enduring television show."

Do the following statements agree with the information given in the text? Choose True, False or Not Given.

22 **Armando Iannucci expressed a need of having more popular channels**

A) True
B) False
C) Not Given

23 **John Whittingdale wanted to dismantle the BBC**

A) True
B) False
C) Not Given

24 **Iannucci delivered the 30th annual MacTaggart Lecture**

A) True
B) False
C) Not Given

25 **Iannucci believes that British television has contributed to the success of American TV shows**

A) True
B) False
C) Not Given

26 **There have been negotiations over the future of the BBC in July**

A) True
B) False
C) Not Given

For questions 27-29, choose the correct answer A, B, C or D. Mark your answers on the answer sheet.

27 **Iannucci praised everything EXCEPT**

A) US shows
B) British shows
C) Corporation
D) British programming

28 **To advise on the charter renewal Mr Whittingdale appointed a panel of**

A) five people
B) two people
C) seven people
D) four people

29 **Who of these people was NOT invited to the discussion concerning BBC renewal?**

A) Armando Iannucci
B) Dawn Airey
C) John Whittingdale
D) Stewart Purvis

PART 5

Questions 30–35

Read the following text for questions 30-35.

PENGUINS' ANTI-ICE TRICK REVEALED

"What we learn here is how penguins combine oil and nano-structures on the feathers to produce this effect to perfection," explains Kavehpour. By analysing feathers from different penguin species, the researchers discovered Antarctic species the gentoo penguin (Pygoscelis papua) was more superhydrophobic compared with a species found in warmer climes — the Magellanic penguin (Spheniscus magellanicus) — whose breeding sites include Argentinian desert.

Gentoo penguins' feathers contained tiny pores which trapped air, making the surface hydrophobic. And they were smothered with a special preening oil, produced by a gland near the base of the tail, with which the birds cover themselves. Together, these properties mean that in the wild, droplets of water on Antarctic penguins' superhydrophobic feathers bead up on the surface like spheres — formations that, according to the team, could provide geometry that delays ice formation, since heat cannot easily flow out of the water if the droplet only has minimal contact with the surface of the feather

"The shape of the droplet on the surface dictates the delay in freezing," explains Kavehpour. The water droplets roll off the penguin's feathers before they have time to freeze, the researchers propose. Penguins living in the Antarctic are highly evolved to cope with harsh conditions: their short outer feathers overlap to make a thick protective layer over fluffier feathers which keep them warm. Under their skin, a thick layer of fat keeps them insulated. The flightless birds spend a lot of time in the sea and are extremely agile and graceful swimmers, appearing much more awkward on land.

Kavehpour was inspired to study Antarctic penguins' feathers after watching the birds in a nature documentary: "I saw these

birds moving in and out of water, splashing everywhere. Yet there is no single drop of frozen ice sticking to them," he tells BBC Earth. His team now hopes its work could aid design of better man-made surfaces which minimise frost formation.

"I would love to see biomimicking of these surfaces for important applications, for example, de-icing of aircrafts," says Kavehpour. Currently, airlines spend a lot of time and money using chemical de-icers on aeroplanes, as ice can alter the vehicles' aerodynamic properties and can even cause them to crash.

Complete the sentences below. Write ONLY ONE WORD from the passage for each answer.

The delay in freezing is dictated by the **30** _____ of the droplet.

Penguins in Antarctic are highly evolved to be able to cope with **31** _____ conditions.

Penguins are insulated by a **32** _____ layer of fat.

On the land, penguins appear much more **33** _____ than in the sea.

The inspiration came to Kavehpour after watching a **34** _____ about penguins.

Kavehpour would like to see **35** _____ surfaces which minimise frost formation.

MOCK TEST 64

35 answers

1 mosquitos / mosquitoes
2 smells
3 soap
4 researchers
5 flowery
6 people
7 D
8 G
9 A
10 I
11 C
12 F
13 B
14 III
15 II
16 V
17 I
18 VIII
19 VI
20 VII
21 IV
22 True
23 False
24 False
25 True
26 False
27 A / US shows
28 C / seven people
29 A / Armando Iannucci
30 shape
31 harsh
32 thick
33 awkward
34 documentary
35 biomimicking
