PART 1

Questions 1–6

Read the text. Fill in each gap with ONE word. You must use a word which is somewhere in the rest of the text.

HOW DOES FARMING IMPACT AIR QUALITY?

Farming releases small particles of pollution into the air. This **Q1** _____s the quality of the surrounding air and has serious impacts on human health. In fact, air pollution caused by **Q2**_____ results in 17,900 deaths in the US every year! We wanted to understand more about which farming processes and foods caused the most **Q3**_____. That way we could look for ways to reduce it. We calculated the total farming-related air pollution released in the US. We broke this data down into different categories for further analysis. We found that animal waste, fertilizer, and tilling **Q4**_____ the vast majority of deaths. Animal-based foods caused nearly four times more deaths than plant-based foods. Finally, we looked at **Q5** _____ that could decrease air pollution. We found that changes in diet were the most effective. But farming interventions alone could lower **Q6**_____ considerably.

PART 2

Questions 7–14

Look at the five reviews of rice cookers, A-E. For which rice cooker are the following statements true? Write the correct letter, A-E, in boxes 7-14 on your answer sheet. NB You may use any letter more than once.

7
The handles at the side are hard to use.

8
It cooks brown rice without making a mess.

9
It automatically switches setting to keep to rice warm when cooked.

10
It's difficult to get the removable top really clean.

11
A selection of recipes is provided with the cooker.

12
It has a handle at the top for carrying the cooker safely.

13
The outside of the cooker doesn't get too hot.

14
You can put the pot in the dishwasher.

A Ezy Rice Cooker This has a 1.8 litre pot and a stainless steel exterior. It has a separate glass lid, and the handle on the lid stays cool. It produces perfectly cooked white rice, but tends to spit when cooking brown rice. There are slight dirt traps around the rim of the lid, and neither the pot nor the lid is dishwasher safe.

B Family Rice Cooker This has a plastic exterior and a flip-top lid. The lid locks when closed and becomes a secure handle to carry the cooker. The aluminium interior pot is quite difficult to clean, and it can't be put in a dishwasher. It's programmed to adjust the temperature once the rice is done so that it stops cooking but doesn't get cold.

C Mini Rice Cooker This has a flip-top lid and a 0.3 litre capacity. The interior pot is made of non-stick aluminium and is dishwasher safe. This rice cooker is ideal when cooking for one. However it does not have any handles at the side, and water sometimes overflows when cooking brown rice.

D VPN Rice Cooker This has a painted steel exterior with a handle on each side and a steel inner pot. It has a lift-off lid and comes with a booklet including a range of ideas for rice dishes. However, the keep-warm setting must be manually selected and the handles are tricky to grip.

E S16 Rice cooker This is simple to use, not spitting or boiling over even when cooking brown rice. The exterior stays cool when in use, so there's no danger of burning your hand. However, the lack of handles is a nuisance, and a recipe book would have been useful.

PART 3

Questions 15–20

The text has six sections, A-F. Choose the correct heading for each section from the list of headings below. Write the correct number, i-vii, in boxes 15-20 on your answer sheet.

List of Headings:

I) Developing an item that appears true to life
II) Extending the project to other endangered species
III) A short but intensive investigation with longer-term follow-up
IV) Problems facing sea turtles at a global level
V) Collection of eggs and their possible onward routes
VI) Intensive and large-scale poaching in one location
VII) Why catching the poachers may not solve the problem

15. Paragraph A **16. Paragraph B** **17. Paragraph C**
18. Paragraph D **19. Paragraph E** **20. Paragraph F**

PREVENTING THE THEFT OF TURTLE EGGS

Conservationists and law enforcement have struggled to prevent wildlife trafficking. But could some plastic eggs and GPS trackers change the game?

A. Humans have been eating sea turtle eggs (and killing adult turtles for meat) for millennia. However, as human populations exploded and as sea turtles began to confront additional threats such as intensive fishing, beach development and climate change, sea turtle populations declined precipitously. Today, all but one of the world's seven species of sea turtles are considered threatened according to the IUCN* Red List. And the one that's not – the flatback turtle – is listed as data deficient, which means scientists simply don't know how it's doing.

B. One major problem is that every year millions of sea turtle eggs are illegally taken by poachers for sale on the black market. The situation is particularly serious in Nicaragua, in Central America, which is home to four sea turtle species. Kim Williams-Guillen, who works for conservation body Paso Pacifico, described the poaching of sea turtle nests on the beaches of Nicaragua as 'uncontrolled, unregulated, extensive and contested'. Even the best-protected beaches are plundered to some extent and it's not uncommon to see poachers digging up nests just meters from tourists watching sea turtles laying their clutch at night, she said. This poaching becomes particularly frenzied during the arribadas – mass laying events where thousands of turtles nest on the same beach for a single night in a biological strategy to overwhelm natural predators.

C. 'Even with armed guards, the numbers of poachers overwhelm military personnel by ten to twenty to one,' Williams-Guillen said. 'Although many poachers are locals with limited resources, during these arribadas there are influxes of gangs of poachers from larger cities outside local communities. These are not just local poor people without other options.' But to protect the country's sea turtles, Williams-Guillen said conservationists shouldn't just depend on catching low-level operators. 'If one poacher decides to stop, another one will just step into his place... we need to know more about the middlemen and people higher up in the distribution chain,' she said.

D. Paso Pacifico's solution is the creation of high-tech sea turtle eggs: fake eggs convincingly crafted to look like the real thing, but which contain GPS tracking devices. These have the potential to reveal the destination markets for trafficked sea turtle eggs. Making convincing sea turtle eggs is not easy, and Paso Pacifico is still working on perfecting a prototype. In particular, it's proving quite problematic to create the right texture, since sea turtle eggs are not covered in a hard shell like those of birds, but are quite flexible. So Paso Pacifico brought in Lauren Wilde, a special effects artist in the US, to create a convincing outer shell. First, Wilde had to get her hands on the real thing. Since it's illegal to send sea turtle eggs over the border, Wilde is using land turtle eggs from California. 'It was really eye opening and important for me to feel these eggs and how the shell bends a little,' she said. To get the GPS device inside the shell, Paso Pacifico is using 3D printers to make a plastic ball which will then have a GPS transmitter fitted inside. This will take the place of the embryo inside the shell. Lastly the fake shells will be sealed with silicone, waterproofing them.

E. Sea turtles on average lay around 100 eggs in a nest, and once the fake eggs are finished they will be slipped in with the real ones. Williams-Guillen said it might even be possible to deliver fake eggs into nests while poachers are at work. Wary of tourists, poachers will often back off if strangers come near and then return when they have gone. 'It would be pretty easy to drop an egg in the dark into a nest they have been digging up,' she said. Once the poacher picks up the fake egg along with the real ones, conservationists and law enforcement agents will be able to track them. Experts believe most of the stolen eggs eventually make their way out of Nicaragua, possibly to El Salvador or Guatemala. However, there is also growing concern that sea turtle eggs from Central America are actually heading to the USA, from where they are sold on to other countries around the world.

F. To date, Paso Pacifico has yet to put a single fake egg in a nest. But Williams-Guillen said she isn't too concerned that publicity for their scheme will result in poachers looking for the eggs. 'The vast majority of the poaching is happening at night, so already it is hard to tell [the eggs] apart, and at this point, poachers and middlemen are not closely inspecting eggs, but rather shoving them into a sack as quickly as possible.' Of course, poachers will eventually become aware of the prospect of fake eggs among the real ones – especially when customers try to bite into an egg and break their teeth on the GPS transmitter instead. So, Paso Pacifico plans to do a massive deployment of as many fakes as possible to gather a lot of data before poachers get wise. Knowing where the eggs go will allow conservationists and law enforcement agents to focus their resources on the right places – whether it be through awareness-building campaigns or crackdowns on illegal sellers. And eventually Paso Pacifico hopes to share the technology with interested parties around the world.

PART 4

Questions 21–29

Read the following text for questions 21-29.

BRITAIN NEEDS STRONG TV INDUSTRY

Comedy writer Armando Iannucci has called for an industry-wide defence of the BBC and British programme-makers. "The Thick of It" creator made his remarks in the annual MacTaggart Lecture at the Edinburgh TV Festival.

"It's more important than ever that we have more strong, popular channels... that act as beacons, drawing audiences to the best content," he said. Speaking earlier, Culture Secretary John Whittingdale rejected suggestions that he wanted to dismantle the BBC.

'Champion supporters'

Iannucci co-wrote "I'm Alan Partridge", wrote the movie "In the Loop" and created and wrote the hit "HBO" and "Sky Atlantic show Veep". He delivered the 40th annual MacTaggart Lecture, which has previously been given by Oscar winner Kevin Spacey, former BBC director general Greg Dyke, Jeremy Paxman and Rupert Murdoch. Iannucci said: "Faced with a global audience, British television needs its champion supporters."

He continued his praise for British programming by saying the global success of American TV shows had come about because they were emulating British television. "The best US shows are modelling themselves on what used to make British TV so world-beating," he said. "US prime-time schedules are now littered with those quirky formats from the UK - the "Who Do You Think You Are"'s and the variants on "Strictly Come Dancing" - as well as the single-camera non-audience sitcom, which we brought

into the mainstream first. We have changed international viewing for the better."

With the renewal of the BBC's royal charter approaching, Iannucci also praised the corporation. He said: "If public service broadcasting - one of the best things we've ever done creatively as a country - if it was a car industry, our ministers would be out championing it overseas, trying to win contracts, boasting of the British jobs that would bring." In July, the government issued a green paper setting out issues that will be explored during negotiations over the future of the BBC, including the broadcaster's size, its funding and governance.

Primarily Mr Whittingdale wanted to appoint a panel of five people, but finally he invited two more people to advise on the channer renewal, namely former Channel 4 boss Dawn Airey and journalism professor Stewart Purvis, a former editor-in-chief of ITN. Iannucci bemoaned the lack of "creatives" involved in the discussions.

"When the media, communications and information industries make up nearly 8% our GDP, larger than the car and oil and gas industries put together, we need to be heard, as those industries are heard. But when I see the panel of experts who've been asked by the culture secretary to take a root and branch look at the BBC, I don't see anyone who is a part of that cast and crew list. I see executives, media owners, industry gurus, all talented people - but not a single person who's made a classic and enduring television show."

'Don't be modest'

Iannucci suggested one way of easing the strain on the licence fee was "by pushing ourselves more commercially abroad".

"Use the BBC's name, one of the most recognised brands in the world," he said. "And use the reputation of British television across all networks, to capitalise financially oversees. Be more aggressive in selling our shows, through advertising, through proper international subscription channels, freeing up BBC Worldwide to be fully commercial, whatever it takes.

"Frankly, don't be icky and modest about making money, let's monetise the bezeesus Mary and Joseph out of our programmes abroad so that money can come back, take some pressure off the licence fee at home and be invested in even more ambitious quality shows, that can only add to our value."

Mr Whittingdale, who was interviewed by ITV News' Alastair Stewart at the festival, said he wanted an open debate about whether the corporation should do everything it has done in the past. He said he had a slight sense that people who rushed to defend the BBC were "trying to have an argument that's never been started".

"Whatever my view is, I don't determine what programmes the BBC should show," he added. "That's the job of the BBC." Mr Whittingdale said any speculation that the Conservative Party had always wanted to change the BBC due to issues such as its editorial line was "absolute nonsense".

Do the following statements agree with the information in the reading text? Choose A (True), B (False) or C (Not Given).

21 Armando Iannucci expressed a need of having more popular channels.
A) True
B) False
C) Not Given

22 John Whittingdale wanted to dismantle the BBC.
A) True
B) False
C) Not Given

23 Iannucci delivered the 30th annual MacTaggart Lecture.
A) True
B) False
C) Not Given

24 Ianucci believes that British television has contributed to the success of American TV-shows.
A) True
B) False
C) Not Given

25 There have been negotiations over the future of the BBC in July.
A) True
B) False
C) Not Given

Choose the correct letter, A, B, C or D.

26 Ianucci praised everything EXCEPT
A) US shows
B) British shows
C) Corporation
D) British programming

27 To advise on the charter renewal Mr Whittingdale appointed a panel of
A) five people
B) two people
C) seven people
D) four people

28 Who of these people was NOT invited to the discussion concerning BBC renewal?
A) Armando Iannucci
B) Dawn Airey
C) John Whittingdale
D) Stewart Purvis

29 There panel of experts lacks:
A) media owners
B) people who make enduring TV-shows
C) gurus of Television industry
D) top executives

PART 5 — Questions 30–35

Read the text below and answer Questions 30-35.

AIR RAGE

The first recorded case of an airline passenger turning seriously violent during a flight, a phenomenon now widely known as “air rage”, happened in 1947 on a flight from Havana to Miami. A drunk man assaulted another passenger and bit a flight attendant. However, the man escaped punishment because it was not then clear under whose legal control a crime committed on plane was, the country where the plane was registered or the country where the crime was committed. In 1963, at the Tokyo convention, it was decided that the laws of the country where the plane is registered take precedence. The frequency of air rage has expanded out of proportion to the growth of air travel.

Until recently few statistic were gathered about air rage, but those that have been indicate that passengers are increasingly likely to cause trouble or engage in violent acts. For example, in 1998 there were 266 air rage incidents out of approximately four million passengers, a 400% increase from 1995. In the same period American Airlines showed a 200% rise. Air travel is predicted to rise by 5% internationally by 2010 leading to increased airport congestion. This, coupled with the flying public's increased aggression, means that air rage may become a major issue in coming years. Aside from discomfort and disruption, air rage poses some very real dangers to flying. The most extreme of these is when out of control passengers enter the cockpit. This has actually happened on a number of occasions, the worst of which have resulted in the death and injury of pilots or the intruder taking control of the plane, almost resulting in crashes. In addition, berserk passengers sometimes attempt to open the emergency doors while in flight, putting the whole aircraft in danger. These are extreme examples and cases of air rage more commonly result in physical assaults on fellow passengers and crew such as throwing objects, punching, stabbing or scalding with hot coffee.

Complete the summary below. Write ONE WORD for each answer.

The first time that an **30** _____ of air rage was recorded was in the 1940's, but the passenger was never actually charged for an offence because there were no clear rules in place to specify where to prosecute. It was later **31** _____ that it would be the country where the plane is registered. Air rage has **32** _____ significantly since this time, growing by a staggering 400% from 1995 to 1998. Air rage is **33** _____ to be a major problem in the future as air travel increases, as do levels of aggression. Angry **34** _____ can put everyone in danger including the pilots, the crew and the other passengers, with some form of **35** _____ being the most common consequence.

MOCK TEST 71

35 answers

1 lower / lowers
2 farming
3 pollution
4 caused
5 interventions
6 deaths
7 D
8 E
9 B
10 A
11 D
12 B
13 E
